

PRESS RELEASE

Pokolm premiumtools push productivity further

Chicago, September 14th, 2026

- For the past two years, customers have been benefiting from short delivery times and excellent application support
- Spinworx: The only milling systems with self-rotation round inserts, so that manual indexing is a thing of the past.
- Trade fair Exhibition appearance in the German Pavilion at the IMTS in Chicago

Pokolm premiumtools have also been easily accessible to the American metalworking market since the beginning of 2024. The German-based company markets its innovative indexable insert milling cutters and other cutting tools via its own Pokolm USA Customer Service Center in Fort Worth, Texas. Pokolm will be presenting highlights from its product range at IMTS in Chicago.

Spinworx as a door opener

Since being developed in 2009, Spinworx® has completely redefined the round insert. As indexable milling cutters, Spinworx® tool systems are equipped with up to ten self-rotating round inserts, depending on the version. The highly productive, time-saving milling system stands for short production times and push productivity further.

The new Spinworx® HT product range expands the proven Spinworx® tooling system with a variant specifically designed for high loads. **Christopher Cooper, Director of Pokolm USA Inc.**, explains: "These cutters have been engineered for demanding materials and manufacturing sectors where performance, productivity, and tool life matter. With industry-leading tool life, proven performance, and relentless durability we don't chase the competition – we set the standard."

The intelligent Pokolm tool system offers the optimum milling cutter for every requirement. Besides Spinworx® and Spinworx® HT, also Squareworx® porcupine cutters and Squareworx® slotting cutters together with Mirroworx® and the Vampire cutter are available in various designs, coatings and in imperial sizes.

Pokolm at IMTS 2026 in Chicago

From September 14 to 19, 2026, visitors to IMTS in Chicago will have the opportunity to talk to Pokolm about innovative tools for a wide variety of materials at the German Pavilion (booth #135470, east building, level 3). You will find Pokolm there, featuring a selection from its machining portfolio.

About Pokolm

Pokolm Frästechnik GmbH & Co. KG, based in North Rhine-Westphalia, has been producing innovative and durable milling tools for 30 years. With a tradition of taking on the most complicated geometries and the most demanding materials, Pokolm has grown into a globally active, medium-sized company in recent years.
